

Vehicle Prices Report February 2026

- **Scooters:** Sub-0.5% pricing despite +11% aluminium and +29% copper inflation under -3% CPI; affordability positioning sustained for Activa, Jupiter, Ntorq and Burgman to protect volumes.
- **Commuter bikes:** Pricing capped within -0.4% to +0.6% despite double-digit metal inflation; mileage and value messaging maintained for Pulsar 125, Raider and XL100 amid weak pricing power.
- **Premium bikes :** Net price decline (-0.5%) despite 75–105% precious-metal inflation; aspiration-led branding continued for Classic 350 and Apache RR, indicating strong cost absorption.
- **Entry & compact cars:** 0% price change even with +11% aluminium and +29% copper costs; finance and exchange schemes used to defend volumes under -7% CPI (cars).
- **Mid-size cars & SUVs:** 0.3–1.6% selective hikes where elasticity allowed; feature-led premiumisation (Magnite, Glanza) supported targeted cost recovery.
- **MUVs & vans:** Moderate selective pass-through (up to 2%) supported by resilient utility demand; value and durability positioning strengthened for Innova-range models.
- **EVs:** 0% price hike despite +163–214% cobalt inflation; technology and sustainability narratives prioritised to avoid affordability shock.
